

## “ Custom Software Solutions ”

### About Us

CLARMONT I. S. Ltd., is a 100% private owned company. CLARMONT based in Central Europe, we sit on the border between East and West. Our center of operations is located in Budapest, Hungary. Our location at the foot of the Buda hills provides an ideal atmosphere for calm, thorough work.

The main fields of activity are **systems integration and custom software development**, IT outsourcing and professional consulting and planning services for management of complex IT investments, as well as **complete system concept** development and planning for specific tasks or general modernization of systems.

CLARMONT I.S. Ltd., focus on custom software **solutions and complex systems development**.

We have entered into **strategic partnerships** with numerous **world-leading** companies in order to be able to satisfy the wide-ranging needs of our clients.

Our services cover the entire lifecycle, from systems design and needs analysis of IT, **banking**, automated authentication and **archiving systems**, through to sales, installation and remote monitoring and maintenance. We also provide **comprehensive** and continuous professional consulting services from pre-sales to post-installation **support**.

The **high level** of knowledge of our experts and their continuous **professional** training and development are a key element in satisfying our **customers and partners**.

- eBusiness Strategy and Implementation
- IT infrastructure planning and associated system concept development and project management
- BI- Business Intelligent systems design, development and integration
- IT and Internet strategic consulting

### Our company Philosophy and mission

„ E-volution: Provide professional solutions to real-word business challanges ”

### Services – Introduction

In this time of constantly emerging new technologies and whirlwind pace, it is easy to get caught up in the **technology** and distracted from key business objectives. At CLARMONT I.S. Ltd., **business** results come first. Our **consulting** team will suggest the best technologies and methods to achieve those results. In our bespoke development projects we staunchly believe in the advantages of using standards-based, **object-oriented technologies**.

## Full range of services

Our systems integration activities consist of the following:

- Integrated Enterprise Management Systems
- E-business solutions, **BI - Business Intelligence Systems**
- Professional requirements-**analysis and consulting** for IT investments
- Communications and **IT infrastructure planning** and associated system concept **development**
- Professional integrated data,database,document, voice and image **near-line archiving solutions**
- Integration of **high-capacity back-end DVD storage systems** (NAS, SAN, MAN, SWAN,etc)
- **Software** and hardware **integration**
- Systems using **automated authentication** and authorization technologies (chip-card, biometric systems)
- Industrial process display systems, **Intelligent centralized control systems**
- **Software** development and **customization**
- **Custom software development**
- Professional **IT projectmanagement**
- **Component based** development
- Network **security**

Our **Systems Integration** experts plan, develop and implement complete IT solutions. This includes integration of multi-vendor hardware and software elements, as well as network integration. We analyse, **develop and implement** a system concept while simultaneously planning the transfer from old systems and the **migration** of data and users to a new improved platform.

## Technology Expertise

**Technology** can be like fashion-the latest new thing sometimes draws the most attention, and then is left behind as the next trend comes along. At CLARMONT, the latest technological hype doesn't impress us. We're more interested in what's actually effective at solving real world problems. That's why we have a wide variety of expertise on many different **platforms**. We won't push you into a specific **technology**-we work with you to find the optimum solution.

## Applied technologies

### Target platforms

- Win32 (Windows NT, Windows 2000/XP)
- Linux, SUN Solaris, és más UNIX platformok (true64, stb)
- Java alapú, platform-függtelen megoldások

### Internetes presentation Layer technologies

- HTML, DHTML, JavaScript/VBScript, Perl/CGI scripting  
Active Server Pages (ASP) & Java Server Pages (JSP)

## Client Testimonial

„...[SANity DB Nas] allowed us to solve our problems at a fraction of the cost of a new RAID or DLT system. Our experiences so far indicate a substantial TCO savings in comparison with other solutions. ERSTE Bank Hungary has realized considerable operational savings in both costs and time through implementation of this system. As a result, we will be performing a comprehensive survey of our systems with a view towards integrating SANity DB Nas wherever feasible. 10 minutes instead of over 24 hours for off-line archived data retrieval - now that's the kind of performance we like to see.”

Némethy Dániel – IT Director, Erste Bank Hungary
